

PRESS RELEASE
For Immediate Release

Delcan opens new office in Edmonton, Alberta

Edmonton, Alberta, September 15, 2009— Delcan is pleased to announce the opening of a new office in Edmonton, Alberta. Mr. Ryan Betker will have responsibility for the office's daily operations with support from Mr. Ian Clements, Delcan's Regional Vice-President. From Edmonton Delcan will offer a full suite of transportation consulting services.

Delcan has a long history of providing transportation consultation services to clients in the Alberta province, such as the City of Edmonton, City of Calgary and the Provincial Government, Alberta Transportation (AT). Sample work in Alberta includes leading a planning study for the North-East and South extensions for the Edmonton Light Rail Transit (LRT) system (Edmonton), the preliminary design of the North-East LRT (Edmonton), the functional program and preliminary design of the Sarcee Municipal Operations Facility (Calgary), the design of a pedestrian bridge over Stoney Trail (Calgary). The establishment of a new office in Edmonton is in response to growing work in Alberta and will allow Delcan to expand our service offerings while maintaining excellent service to our clients.

The establishment of the Edmonton office also creates opportunities to employ local engineers and to provide students with mentoring services and co-op opportunities. For a full list of current Delcan vacancies, interested parties should visit Delcan's website at <http://delcancareers.com/Homepage.aspx>

Mr. Ryan Betker will lead the Edmonton Office. Ryan has ten years of experience as a transportation engineer, with most of his career spent working for the City of Edmonton. While with the City of Edmonton, Ryan served as both a Detour & Traffic Safety Engineer and a Senior Transportation Engineer. Ryan is currently a Project Manager for an interchange planning study and associated network concept planning for the Highway 216 (Anthony Henday Drive) and 127 Street Interchange Planning Study. Since joining Delcan in 2008, Ryan has played a critical role on projects in both Edmonton and Calgary and has provided outstanding service to his clients.

Mr. Ian Clements, Regional Vice-President of Transportation will support Mr. Betker in his new role and will provide senior level management for the office. Since 2000, Ian has been involved with numerous projects in Western Canada including the award winning Kicking Horse Canyon Bridge, the West Apron Expansion of the Vancouver Airport, and Edmonton's planned Light Rail Transit systems. Ian is a valuable asset in this region and brings 30 years of experience with expertise in bus rapid transit, strategic transport planning, property development, civil/structural engineering and mining.

Ian Clements, Regional Vice-President of Transportation speaking of the new office said, "Edmonton has long been a major economic centre for northern and central Alberta. With its growing population and close proximity to twenty-five other

municipalities, its transportation needs are certainly unique. Delcan looks forward to expanding our business in this area and to continuing to serve our client's needs. We would encourage local engineers to visit the Delcan website to learn more information about joining our dynamic team."

The Edmonton Office can be reached at:

The Capilano Centre
9945 50th Street, Suite 400
Edmonton, AB T6A 0L4
780-485-1163.
